## SUMMARY

Results-driven Full-Stack Developer skilled in building scalable web applications, integrating secure APIs & Enhancing UI/UX. Proven Expertise in performance Optimization, User engagement, and Agile software delivery.

## EXPERIENCE

### Frontend Developer

Jun 2024 – Aug 2024

Edunet Foundations

Vijayawada, AP

- Architected a responsive Portfolio website to showcase projects and achievements, improving load speed by 60%.
- Leveraged and optimized HTML5, CSS3, & JavaScript to engineer a cross-browser compatible interface with seamless, engaging UI/UX.

## PROJECTS

### Carpooling Management System

GitHub

- Deployed a Full-Stack Software Project for Real-time Ride-sharing with features like secure user authentication, live tracking, route optimization, and an admin dashboard using Agile methodology.
- Enabled users to sign up, share & search available rides, and manage ride requests seamlessly while providing an interactive map for route visualization.
- Tech stack: React.js, Node.js, PostgreSQL, Docker, Leaflet API, OpenStreetMap

### BeatBridge - Music Playlist Migration Tool

GitHub

- Engineered a high-performance web application with Dynamic cross-platform track mapping, enabling seamless playlist migration across Spotify, YouTube Music, and other platforms, reducing manual transfer effort by 90%.
- Architected a true One-click transfer workflow for power users, secure OAuth authentication, Automated token refresh, and resilient API integration ensuring reliability and zero data loss.
- Tech stack: TypeScript, Next.js, NextAuth.js, Prisma ORM, SQLite, Spotify Youtube Music API

### Glaucoma Detection using CNN

GitHub

- Designed an AI-based Glaucoma Detection System using Convolutional Neural Networks (CNN) to analyze fundus images for early diagnosis.
- Collected and Preprocessed a labeled retinal image dataset, built a custom CNN architecture with convolution, pooling, dropout, and dense layers, and achieved an Accuracy of 96%.
- Tech stack: Python, TensorFlow, OpenCV

## SKILLS

|                        |                                                                                        |
|------------------------|----------------------------------------------------------------------------------------|
| Programming Languages  | Java, Python, C++, C, JavaScript, TypeScript, HTML5, CSS3, SQL, Prolog                 |
| Frameworks & Libraries | React.js, Node.js, Express.js, Next.js, NextAuth.js, Socket.io, REST API, Tailwind CSS |
| Databases & Tools      | MySQL, SQLite, MongoDB, PostgreSQL, Git, GitHub, VScode, Postman                       |
| Cloud & DevOps         | AWS (S3, Lambda), Docker, GitHub Actions, CI/CD(Jenkins - BK)                          |
| Other Skills           | Analytical Thinking, Team Collaboration, Adaptability, 250+ LeetCode (DSA)             |

## EDUCATION

Computer Science and Engineering, SRM University

2022 – 2026

CGPA – 8.51 , Andhra Pradesh, INDIA

Intermediate, Resonance Junior College

2020 – 2022

MARKS – 864/1000 , Andhra Pradesh, INDIA

## HACKATHONS

- **Winner of Hack SRM 4.0:** Orchestrated “Bolt - The Salvation”, an IoT-based EV Battery Safety System that predicts & prevents battery explosions by analyzing Real-Time Sensor Data.
- Built a mobile application to provide instant alerts and safety recommendations, using Firebase, NodeMCU IoT, and sensors for seamless data collection, analysis, and visualization.(Overview)

## CERTIFICATIONS

- Comprehensive Java Programming Course (Udemy)
- MongoDB Associate Developer Course (MongoDB University)
- Data Structures & Algorithms Course (Simplilearn)
